

PB Washington Update - June 29, 2012 - Interim Update - Senate Passes MAP-21

Final Update of the week and month!!

This afternoon, following House passage of the final MAP-21 two-year surface transportation authorization bill, the Senate also passed the bill by a vote of 74 to 19.

The bill now goes to the President who is expected to sign it shortly.

Congratulations to the transportation industry which never gave up and worked closely together to pass this critical piece of legislation. While at one point we had hoped for more and there are still serious concerns about the long-term funding of the Highway Trust Fund, MAP-21 will provide some needed stability to the highway and transit program.
